

Advertising Performance Checklist

Run this checklist weekly for active campaigns and monthly for a full account-level audit.

Campaign Structure

- ☐ Separate campaigns exist for Auto, Manual Broad/Phrase/Exact, and Brand Defense
- ☐ Each campaign maps to a single, clear objective (visibility, conversion, or defense)
- ☐ Budget allocation matches which SKUs actually drive margin
- ☐ New product launch campaigns isolated from steady-state campaigns

Keyword & Targeting Health

- ☐ Search term report reviewed for the last 30-60 days
- ☐ High-converting search terms harvested into exact-match campaigns
- ☐ Irrelevant or low-intent search terms identified for negation
- ☐ Competitor ASIN/product targeting reviewed for relevance and cost
- ☐ Keyword match types balanced — not over-reliant on broad match alone

Bid & Budget Management

- ☐ Bids adjusted based on keyword-level ACOS, not campaign-level average
- ☐ Daily budget caps checked — are campaigns running out early in the day
- ☐ Dayparting reviewed if the platform supports it
- ☐ Bid changes logged so impact can be tracked week over week

ACOS / ROAS Monitoring

- ☐ Break-even ACOS calculated per SKU based on actual margin
- ☐ Campaigns exceeding target ACOS by 20%+ flagged for review
- ☐ TACOS (Total ACOS) tracked, not just ad-level ACOS, for true profitability view
- ☐ Trend compared against last 3 reporting periods, not a single snapshot

Search Term Cleanup

- ☐ Zero-conversion search terms with meaningful spend added as negatives
- ☐ Duplicate targeting across campaigns identified to prevent self-competition
- ☐ Branded search terms segregated from generic terms for accurate CPC benchmarking

Advertising Performance Checklist

- ☐ Negative keyword list reviewed monthly, not left static

Placement & Timing

- ☐ Placement report reviewed (Top of Search vs Rest of Search vs Product Pages)
- ☐ Placement bid multipliers adjusted based on conversion rate by placement
- ☐ Peak order-hour data used to inform any dayparting decisions

A recurring audit checklist to keep Amazon, Flipkart, and Meesho ad campaigns efficient and on-target.
