

E-commerce Growth Resources

Use this as a quarterly planning checklist to identify which growth levers are still untapped in your business.

Catalog Expansion

- ☐ Best-sellers analyzed to identify natural size/color/variant extensions
- ☐ Bundle or combo offers tested where basket-size increase is possible
- ☐ New SKUs planned against upcoming seasonal demand, not launched randomly
- ☐ Underperforming SKUs reviewed for delisting or repricing

Multi-Marketplace Strategy

- ☐ Presence evaluated across Amazon, Flipkart, Meesho, Ajio, Myntra as category-fit
- ☐ Pricing kept consistent enough across platforms to avoid channel conflict
- ☐ Platform-specific strengths used deliberately
E.g. Meesho for price-sensitive volume, Myntra/Ajio for fashion-forward positioning.
- ☐ Inventory allocation reviewed so no single platform is starved of stock

Customer Retention & Reviews

- ☐ Post-purchase follow-up used to request reviews within policy guidelines
- ☐ Negative reviews responded to professionally and promptly
- ☐ Repeat-purchase categories identified for subscribe-and-save or reorder prompts
- ☐ Product quality issues from returns fed back into sourcing/QC decisions

Seasonal & Festive Planning

- ☐ Key sale events mapped on a calendar (Republic Day, Holi, Independence Day, festive season, Diwali, Christmas/New Year)
- ☐ Inventory built up 4-6 weeks ahead of major sale events
- ☐ Ad budgets pre-planned and scaled up in the weeks around big sale events
- ☐ Post-sale-event demand dip anticipated in cash flow and inventory planning

Data & Reporting Discipline

- ☐ Monthly P&L tracked per product, not just overall account revenue
- ☐ Business reports reviewed for traffic, conversion rate and unit session %

E-commerce Growth Resources

- ☐ Return and cancellation trends tracked by SKU to catch quality issues early
- ☐ A single source of truth (dashboard/sheet) maintained across all marketplaces

Brand Building

- ☐ Consistent visual identity used across all listings and platforms
- ☐ Brand store/storefront set up on marketplaces that support it
- ☐ Off-platform presence (Instagram/website) used to build direct-to-customer trust
- ☐ Customer feedback loop used to continuously refine product and messaging

A checklist of proven growth levers to work through once the fundamentals of listings and ads are in place.
